Brochure 2009

A ProfileData™ Service

ProfileData offers a comprehensive range of **web-based investor relations data services** designed to enhance listed company websites. ProfileData's research department monitors listed company activity on a real-time basis. This enables us to be pro-active rather than reactive. Although built on proven designs and delivery methods, ProfileData's IT team can customise the IR data services to meet each client's technical and design requirements.

Advanced end-of-day price (with stats on graph)

The figure displays a detailed price chart for a stock from June 2007 to November 2007. The price line is overlaid with a 5-day moving average (red) and a 20-day moving average (purple). A green shaded area represents the Bollinger Band. Below the price chart, volume bars are shown, color-coded by day type: green for up days, red for down days, and grey for no change days. At the bottom, an RSI (14 days) indicator is plotted, showing values between 30 and 100.

Subject: PLACECOL News Alert

ShareData Online Alert Service

Company: Placecol Holdings Ltd

News Type: Official Announcement

Placecol - emphasis of matter

The JSE Ltd ("JSE") advised that the audit opinion on the above company's revised annual financial statement for the year ended 29 February 2008 contains an "emphasis of matter". Shareholders are advised to refer to the financial statements to ascertain the exact nature of the modification. Accordingly, the company's listing on the JSE TRADELECT system will be annotated with an "E" to indicate the modification. The annotation will be removed when the company's auditors report no longer contains a modified audit opinion.
